

GHANZA BETANANDA DILVA

Banyuwangi, East Java | ghanzabeta212@gmail.com | +62 859 3008 8301 | [Linkedin](#)

I am a seventh-semester Information Systems student who is known as a hardworking, motivated, and ambitious individual. I have a strong interest in the field of data, especially in data analysis and data science. I am experienced in processing and analyzing data using Python and SQL for data extraction and manipulation. I also utilize MySQL and PostgreSQL as database management systems and Tableau for data visualization to generate meaningful business insights. In addition, I am familiar with data modeling and system analysis using Enterprise Architect (UML diagrams) and apply design tools such as Figma to support interface prototyping when needed. I enjoy working collaboratively and have strong analytical and communication skills, enabling me to contribute effectively to data-driven projects.

EXPERIENCE

Front-End Developer at Diskominfo Banyuwangi (2025)

As a Front-End Developer and UI/UX at Diskominfo Banyuwangi, I contributed to the development of the CCTV Analytics Dashboard, a web-based system used for monitoring and analyzing CCTV data in Banyuwangi. In this role, I designed user-friendly interfaces and improved user interaction flow while also developing responsive web pages using React.js.

Data Scientist at the Social Economic Accelerator Lab (SEAL) (2025)

As a Data Scientist at the Social Economic Accelerator Lab (SEAL), I contributed to the development of SATA JATIM (Satu Data Jawa Timur) in collaboration with Diskominfo Jawa Timur. In this role, I was responsible for performing data cleaning, transformation, and validation to ensure data accuracy and consistency before integration into the system. I also developed automation scripts to streamline the process of inputting data into the database, which improved the efficiency of data management on the platform.

Member of Laboratorium Pertanian Cerdas (2024-Present)

Actively involved in research and development related to smart farming technology, focusing on digital solutions and system innovation to support modern agriculture.

Project Pengembangan Perangkat Lunak BibiTani (2024)

As a Designer in developing the BibiTani Website, I was responsible for designing the system architecture of a web-based platform that facilitates farmers in submitting horticultural seed assistance proposals to the Dinas Tanaman Pangan, Hortikultura, dan Perkebunan (DTPHP) as stakeholders. In this role, I created essential system design documentation by developing Use Case Diagrams to define system functionalities, Sequence Diagrams to illustrate process flows and interactions, and Class Diagrams to model system structure.

Data Analysis: Transforming Data Into Meaningful Insights. (2024)

As a Data Analyst in the Independent Study Program at Karier.mu, I gained comprehensive hands-on experience in the field of data analytics. During this program, I studied key analytical concepts such as Data Analytics Essentials and Business Question formulation, Data Preparation, and Exploratory Data Analysis (EDA). I worked with Python (Pandas, NumPy, Matplotlib) and SQLite to perform data processing, cleaning, and analysis. In addition, I developed interactive data visualizations to generate insights that support data-driven decision making.

Project Pemrograman Berorientasi Objek SIMATA (2023)

As a System Analyst in the SIMATA application development project, I analyzed user and system requirements for a web-based thesis submission platform at the faculty level, translating needs into clear functional specifications for development.

EDUCATION

JEMBER UNIVERSITY

Bachelor of Computer Science

- Major in Information System
- Cumulative GPA : 3,90/4,00

SMAN 1 GENTENG BANYUWANGI

Jember, Indonesia

August 2022- August 2026 (Expected)

Banyuwangi, Indonesia

3 May 2021

ACTIVITIES

- *Tribe Karier.mu Studi Independen Batch 7*
- *Master of Ceremonies at webinar "Cultivating the Future: IoT and FOSS for Precision Farming"*
- *Head of Secretarial Division at NIGHTCETAMY Inaguration Computer Science Faculty 2023*
- *Head of Equipment Division at robot competition "ROBOCLASH 2024"*

ACHIEVEMENT

Top 10 Essay Competition ECOTION 1.0 IPB 2024 - National level

- categories of economic development based on local potential and social inclusion
- The proposal title STARTIN: AGROINDUSTRIAL STARTUP IN ADVANCEING THE BANYUWANGI ECONOMY

Bronze Medal Math Olympiad "Kompetisi Sains Merdeka Indonesia" 2023 - National level

First Rank Program Pembinaan Mahasiswa Wirausaha(P2MW) – University level

- Agrocomplex cultivation category (food crops, horticulture, forestry, plantations, animal husbandry and fisheries).
- The proposal title "aquaponics which combines aquaculture and hydroponics by utilizing a narrow yard"
